Tank Cleaning Project Manager

Description

EISCO is looking for experienced Tank Cleaning Project Managers to join or growing team. Ideal candidate will have 5+ years of tank cleaning experience, lesser experience can be acceptable upon interview and work history. Be capable of managing/directing all aspects of a tank cleaning project as it is related to customer/vendor interaction and safe completion of each job. An ideal candidate will possess a Tank Entry Supervisor credential, TWIC Card and have experience in managing the execution of black oil, asphalt, diesel, jet, gasoline, refinery slop/process water (including sour water) and ethanol tanks – any combination is a plus. Candidates must be proficient in Windows Office Suite and capable of ensuring compliance with all EISCO policies and procedures, while maintaining/improving relationships with customers by providing quality, timely tank cleaning services. Other duties as assigned. This position requires up to 90% travel throughout the United States and Caribbean.

Responsibilities

Physical demands include standing on feet 100% of day, must lift 50 lbs, be capable of wearing respiratory protection for 6 hours in a day, have full dexterity of limbs and range of motion, have good hearing, be capable of climbing and working from elevated surfaces, be capable of entering and working in confined spaces.
